How to add schlage connect to ring

Two years ago, I replaced our door lock with a new Schlage Connect Smart Deadbolt lock. Schlage is just one company that offers Z-Wave locks. At the time, I purchased a Samsung Smartthings hub as it was one of the only ways to integrate the door lock with Amazon Alexa. After the first six months, the lock integration didn’t always work. Alexa worked wonderful and would even notify us that our front door was unlocked (if the communication was working) when we’d set our Amazon Ring alarm system. The issue wasn’t the lock and it wasn’t Alexa. It was the Smartthings hub communicating with the lock. Recently, Ring updated their Z-Wave capabilities to include other devices such as locks. As of today, not only can I lock and unlock from Ring or Alexa, I can even reset the passcodes without needing to program the lock at the lock. I can even set my alarm to disarm if a valid code was entered at the lock. I highly recommend checking out the new Z-Wave functionality in Ring. If you don’t have a smart lock, I recommend the Schlage Connect smart locks. The lock I have is shown installed below: So, you purchased a new smart home device? Here’s a list of resources to help you get connected with your Schlage smart lock quickly and easily. READ MORE As smart homes become more popular, the number of devices we have in our homes is exploding, sometimes more quickly than we even realize. Do a count right now and you might be surprised by how many you have. (Go ahead. We’ll wait.) Whether you just upgraded to a Schlage smart lock, got a new smart home hub or decided to get more from your voice assistant than just asking Alexa about the weather, making all these devices work together is key to ultimate convenience. Here’s a list of resources to help you get connected quickly and easily. Before you can sync your devices, make sure the lock is properly installed on your door and that you have the smartphone app that coincides with your hub, if necessary, and lock. You may need to create an account and complete some initial start-up steps via the app before pairing your devices. Find step-by-step interactive installation instructions for the Schlage Encode, Schlage Connect and Schlage Sense deadbolts online. Now let’s get connected. Why pair SmartThings with the Schlage Connect® Smart Deadbolt? Let in trusted friends and family or secure the deadbolt if you forgot by locking and unlocking your door from anywhere using the SmartThings app Gain peace of mind by checking the status of your lock from your smartphone Get app alerts when a user code is entered so you know who is coming and going from your home More advanced features with the Schlage Connect lock with Z-Wave Plus To pair your Schlage Connect Smart Deadbolt with Samsung SmartThings, you’ll need to use the SmartThings app on your mobile device and follow the directions in the app. Additional instructions to get you started can be found here. At the end of enrollment, a green light on your lock indicates success. Why pair Wink with the Schlage Connect Smart Deadbolt - Z-Wave Plus? Let in trusted friends and family or secure the deadbolt if you forgot by locking and unlocking your door from anywhere using the Wink app Add and delete user codes at any time and from anywhere via the Wink app, like when you need to give access to a trusted friend while you’re stuck at work Check the battery level via the Wink app Create convenient shortcuts and more advanced features To sync your Schlage Connect Smart Deadbolt with Z-Wave Plus to your Wink hub, open the Wink app on your mobile device and follow the app’s instructions. When you have successfully connected your devices, you will see a flashing green check mark on the lock. The Wink app will also indicate that it has found the lock. Why pair Nexia with the Schlage Connect Smart Deadbolt - Z-Wave Plus? Let in trusted friends and family or secure the deadbolt if you forgot by locking and unlocking your door from anywhere using a compatible app Add and delete user codes at any time and from anywhere from your mobile device, like when you need to give access to a trusted friend while you’re stuck at work Check the battery level via the Wink app Get app alerts when a user code is entered Use Google Assistant to control your Schlage Connect lock with voice commands Get step-by-step instructions for how to add your Z-Wave Schlage Connect Smart Deadbolt to your Nexia Bridge. With remote access of our smart locks, you can use a compatible app to unlock the door for someone, even if you aren’t home. But what if you want to make sure – actually see – who’s at the door before you tap unlock. You can do that and more when you pair your Schlage Encode™ Smart WiFi Deadbolt with the Ring Video Doorbell. Lock and unlock your door directly from the Live View in Ring App Use the Ring Video Doorbell to verify your guest’s identity before granting access Add access control to your Ring of Security (doorbells and cameras) To connect your Schlage Encode lock with the Ring Video Doorbell, follow the instructions provided in your Ring App during setup. A Ring Alarm Base Station or Ring Protection Plan are not required to use the Schlage Encode lock with your Ring Video Doorbell. Why pair the Ring Alarm Base Station with the Schlage Connect Smart Deadbolt - Z-Wave Plus? Let in trusted friends and family or secure the deadbolt if you forgot by locking and unlocking your door from anywhere using the Ring App Arm or disarm your Ring Alarm right at the lock Add and delete user codes at any time and from anywhere from your mobile device, like when you need to give access to a trusted friend while you’re stuck at work Check the battery level via the app Get app alerts when a user code is entered To pair your Schlage Connect Smart Deadbolt with the Ring Alarm Base Station, simply follow the step-by-step instructions in the Ring App. The Schlage Sense® Smart Deadbolt is compatible with a variety of Apple® devices, including Apple TV, iPad and Homepod. Why pair one of these devices with the Schlage Sense lock and Bluetooth technology? Control your lock and manage settings from anywhere with the Schlage® Home app and one of the Apple devices above, which can give you greater convenience and security Allow your lock to work in tandem with other Apple HomeKit™-enabled devices in your home through the Apple Home app Use Siri® to lock and unlock your door for hands-free convenience Receive notifications when the lock is used so you know who is coming and going from your home when the lock is connected to the Apple device or within Bluetooth range To set up remote connectivity with Apple HomeKit using a compatible Apple TV, iPad or HomePod, open the Schlage Home app on your iOS device and choose “Continue with HomeKit.” Once you’ve chosen the “Continue with HomeKit” option, follow the instructions provided in the Schlage Home app. Don’t forget that you can use voice assistants with your smart deadbolts, too. In most cases, you’ll need to use one of the smart hubs above to take advantage of the compatibility between your lock and Amazon Alexa, Google Assistant or Siri. Because of its built-in WiFi, you don’t need a smart hub to connect your Schlage Encode Smart WiFi Deadbolt with an Alexa-enabled device. To start using your Schlage Encode lock with Alexa, access the Alexa app on your smartphone, choose the Schlage Home skill and follow the instructions in the app. If you have the Schlage Sense Smart Deadbolt, all you need is the Schlage Sense WiFi Adapter to use Alexa. Again, follow the instructions for the Schlage Home skill in the app. If you have the Schlage Connect Smart Deadbolt with Zigbee technology, you’ll need Key by Amazon, Echo Plus or Samsung SmartThings. Use the links below for instructions on how to connect your Schlage Connect deadbolt with Zigbee to Alexa. Amazon Echo Plus Samsung SmartThings Samsung SmartThings is also compatible with Schlage Connect Deadbolt with Z-Wave Plus technology, as are Wink and Ring Alarm. Use the links below for instructions on how to connect your Schlage Connect deadbolt with Z-Wave Plus to Alexa. Samsung SmartThings Wink Ring Alarm To pair Google Assistant with your Schlage Encode Smart WiFi Deadbolt, follow these instructions. If you’re a Google Assistant user and have the Schlage Sense deadbolt, make sure you have the Schlage Sense WiFi Adapter to take advantage of voice control capabilities. Find instructions here. If you’re still considering which lock is right for you, try our Smart Lock Selector Tool. You can also learn more about all of Schlage’s smart locks and find additional partners that help you get the most from your deadbolt every day at Schlage.com. Ring has emerged as one of the premier home security systems with the Ring Alarm and the Ring Protect Plus plan. Despite being one of the top home security companies, they do not have any of their own smart locks. Instead, they partnered with companies who have a solid reputation for making locks. What smart locks work with Ring? Ring has partnered with Schlage, Kwikset, and Yale to allow users to unlock their smart locks from the Ring app. The following Smart lock brand lines work with Ring: Schlage Connect, Schlage Encode, Kwikset SmartCode, and Yale Assure and Yale Pro SL. For the most updated listed of locks, Ring maintains a webpage located here. Ring has publicly stated that they are working on integrating more locks with their ecosystem, so I expect locks will be added in the future. Related Content: Are Smart Locks Hard to Install? Find Out Here! Now that you know which locks are compatible with ring, how do you get them connected? How Does A Smart Lock Connect to Ring? The similarity between all these smart locks listed is that they all use Z-Wave, as Ring intends for these locks to be paired with your Ring Alarm Base station. The Ring Alarm Base Station has a Z-Wave controller built in to it. The exception is the Schlage Encode, which is a Wi-Fi connected locks. Wi-Fi locks are less common than Z-Wave locks because Wi-Fi consumes more power. People generally don’t want to be replacing batteries every month or every couple week. Related Content: Why Use Smart Locks? The 10 Benefits You Need to Know There is one key difference when setting up the Schlage Encode compared to the Z-wave counterparts, and that is when the Ring app asks “How will you connect your lock to the Ring app?” Therefore, I’ll be separating the steps into two different sections. Using the Wi-Fi connected Schlage Encode will allow you to pair the smart lock to a particular Ring Video Doorbell or Ring Camera. Once integrated, you will be able to control the lock while viewing the video feed from that camera. This is great for when someone rings the doorbell, and you want to unlock the door to let them in. The Z-Wave lock currently do not have this feature; therefore, it is unique to the Schlage Encode. Related Content: Can the Ring Video Doorbell work without Wi-Fi? What if they disconnect? How to Connect a Wi-Fi Smart Lock to Ring Note: As of 2021, Schlage Encode is the only compatible Wi-Fi smart lock. Follow the Manufacturers instructions for initially setting up the Smart Lock.Use the Amazon Key app to connect your Smart Lock to it.Open the Ring appOpen the Main Menu by tapping the three bats in the top left cornerSelect “Set Up a Device”Select “Locks & Access Controllers”Select “Connect via Key by Amazon”Select “Connect”Ring will connect to the Amazon Key API to get a list of locksSelect “Connect” after selecting which locks you want to connect Ring to.If you only have one smart lock connected to Amazon Key, it will automatically be selected and you can tap “Connect” to proceed.Select which Ring Camera of Ring Video Doorbell you want the Smart Lock associated withSelect “Connect” after choosing the cameraSelect “Done” Related Content: Are Smart Locks Worth It? Hint: You Can Forget Your Keys Now If you want to test out locking or unlocking the door while viewing the live video feed, here is how you do it. It’s easier than you might think! From the Ring app home screen, select the camera that the smart lock is linked toTap the deadbolt to lock or unlock your smart lock. How to Connect a Z-Wave Smart Lock to Ring Note: Not all Z-Wave Smart Locks work with Ring. Only those listed on the Ring website will work. Follow the Manufacturer’s instructions for initially setting up the Smart Lock.Open the Ring appOpen the Main Menu by tapping the three bats in the top left cornerSelect “Set Up a Device”Select “Locks & Access Controllers”Select “Connect Using Z-Wave”Select the specific model of Smart Lock you have.A list of all the compatible smart locks will be displayed.Select “Ready”This page just displays some information about your particular smart lock and a larger picture to confirm you have the same model.Pair your lock with the Ring Alarm Base StationThe Ring app will guide you through this process. The exact process you need to follow will vary depending on which brand of smart lock you have. Schlage will usually have a QR Code, and Yale has a paring mode you can enter on the lock itself.Once paired, ring will automatically move to the next screen.Select the room where the smart lock is located.If you don’t have a room, select “No Room Assigned”.Setup shared users if desired, or press “Don’t Add Any Users”Select “Continue” to move to the mode settingsYou may want to read about the settings before continuing to learn more about their functions.Set Disarmed Mode Setting, and press “Continue”This setting will allow you to disarm your Ring Alarm system when the smart locked is unlocked using a code. Using a key to unlock the smart lock will not disarm the Ring Alarm.Set Away Mode Settings, and press “Continue”This page has two settings that allow you to put the Ring Alarm in an Away mode alarm state when you put the smart lock in a locked state.One option is to do this with the one touch feature on the smart lock, and the other option is to do this when a code is entered on the smart lockSelect “Done” Your Smart Lock is now integrated with the Ring app and your Ring Security system. You can lock and unlock it from the Ring app, and also have the lock automatically arm or disarm the Ring Alarm if desired. Related Content: What Is The Most Secure Smart Lock? Our Pick For Most Secure Lock In Summary Ring is an innovative company at the forefront of smart home security. They are constantly adding new integrations, so if the smart lock you have or want to install isn’t an option yet make sure to check back. Or e-mail support, although they tend to give canned answers of, “It’s planned for the future.” Can you lock and unlock your door with Ring? The Ring app can control (unlock or lock) select Z-Wave smart locks from Schlage, Kwikset, and Yale. The Schlage Encode is the only Wi-Fi option that works with Ring, but it does allow you to lock or unlock your door while live viewing the Ring video feed. The Schlage Encode connects to your Ring system through Amazon Key, whereas the Z-Wave locks directly integrate with Ring and become part of the Ring Alarm system.
